OUR ADVERTISERS

(Continued from page 361)

Carolina Biological Supply Co., Elon College, North Carolina, carries a very full stock of preserved and living biological specimens. We have purchased much from them and find the quality of their preparations first class. Most of our lantern slides have been made by Dury in Nashville at a very cheap rate. They are also the source of our photographic supplies. Our lantern slides are stored in a Multiplex Lantern slide cabinet. This has, we think, many advantages over other cabinets. It is made of steel and all slides in a compartment may be seen at once against a white background and any single slide may be removed without disturbing the other slides. These are advantages which we think our members will appreciate. A new comer to our Journal in this issue is R. Fuess, makers of physical instruments of quality. They have recently brought out a new optical bench of great interest to physicists. Their Doctor Ginsberg has written an interesting article on this bench which unfortunately we did not have space to print in this issue. I believe, however, that this company will be glad to send a copy of this paper to any of our interested members. Write to R. Fuess, New York City. On the page, *Where to Buy Biological Supplies*, is a list of reputable biological dealers. Every biologist should have their catalogues and should investigate their products. It is unnecessary to say much about Cullom & Ghertner Co., Printers, and the Capitol Engraving Co., since the former prints the Journal and the latter makes most of our engravings for the illustrations. Their work speaks for itself.

The above advertisers want to do business with you. All they ask is an opportunity to demonstrate to you that they can supply you quality supplies as cheap as any dealer. Won't you give them an opportunity?

MEMBERSHIP ROLL¹

OF THE TENNESSEE ACADEMY OF SCIENCE

The letter H after the name designates honorary membership in the Academy; A and AF, membership and fellowship, respectively, in the American Association for the Advancement of Science. The number after the name indicates the date of becoming life members or of admission to the Academy.

SUSTAINING MEMBERS

Any person or educational institution contributing ten dollars (\$10.00) to the Academy may be enrolled as a sustaining member. The list published here includes, with the sustaining members of 1933, those of 1932 and 1931 who, not having asked for discontinuance, may yet renew their membership.

LIFE MEMBERS

Any one who contributes the sum of fifty dollars (\$50.00) or more to the Academy at one time or *who contributes a sum which with dues already paid aggregates fifty dollars (\$50.00) or more* may be elected by the Executive Committee a Life Member. Life Members enjoy all the privileges of the Academy without further payment of dues.

- Cole, Whitefoord R., 1931.....President of the Louisville and Nashville Railroad, Louisville, Ky.
- Glenn, Leonidas C., A F 1931....Professor of Geology, Vanderbilt University
- Gordon, Charles H., A F 1931.....Emeritus Professor of Geology, University of Tennessee
- Litterer, William A., Anna Marie, Fla., 1930...Tennessee State Bacteriologist, Nashville, Tenn.
- McGill, John T., A F 1931.....Emeritus Professor of Organic Chemistry, Vanderbilt University
- Morgan, Harcourt A., A F 1931.....President of the University of Tennessee
