JOURNAL

of the
Tennessee Academy of Science

EDITORIAL STAFF

JESSE M. SHAVER, *Editor*, George Peabody College for Teachers, Nashville.
HARRY MONK, *Ornithology Editor*, Ovoca Apts., Nashville.
GEORGE M. HALL, *Geology Editor*, University of Tennessee, Knoxville.
H. M. JENNISON, *Botany Editor*, University of Tennessee, Knoxville.
HENRY E. MELENKY, *Parasitology Editor*, Vanderbilt University, Nashville.

Entered as second-class matter February 12, 1926, at the post office at Nashville, Tennessee, under Act of August 24, 1912, acceptance of mailing at special rate of postage provided for in Section 1103 Act of October 3, 1917, and authorized September 16, 1931.

Published quarterly, in January, April, July and October, by the Tennessee Academy of Science at Nashville, Tennessee.

The Journal is sent to all members not in arrears for dues. The subscription price is \$2.00 a year, invariably in advance. Single copies 50c. One dollar from the \$2.00 dues of each member is for a subscription to THE JOURNAL OF THE TENNESSEE ACADEMY OF SCIENCE.

All articles and communications for publication, books and publications for review should be addressed to the Editor.

New subscriptions, changes of address, and applications for membership should be addressed to the Secretary. Personal items, news of events in the scientific world, and other notes suitable for our "Notes Here and There" department may be addressed to the Editor.

THE TENNESSEE ACADEMY OF SCIENCE

(FOUNDED, 1912, AT NASHVILLE, TENNESSEE)

Affiliated with the American Association for the Advancement of Science

OFFICERS

GEORGE M. HALL, *President*, University of Tennessee, Knoxville.
DR. WILLIAM A. LITTEKER, *Vice-President*, State Bacteriologist, Nashville.
JESSE M. SHAVER, *Editor*, George Peabody College for Teachers, Nashville.
J. T. MCGILL, *Secretary-Treasurer*, Vanderbilt University, Nashville.
MISS ELEANOR EGLESTON, *Librarian*, Vanderbilt University, Nashville.

The Tennessee Academy of Science is very anxious to include in its membership all teachers and professors of science, research workers in science both in educational institutions and industrial establishments, and all others who are interested in some phase of science. We invite you to join our organization and take part in our activities. The annual dues are: \$2.00 for members and \$10.00 for sustaining members. They may be sent direct with your application for membership to the secretary.

Choose your Microscope

AS YOU WOULD CHOOSE A FRIEND

The finest instrument available is none too good for the person engaged in work as meticulous as microscopy. For that reason you should use the utmost care in selecting your microscope.

All B & L Microscopes are constructed with the same care as the DDE Research Model (above), which has been so enthusiastically welcomed by research scientists. The new B & L Model H Microscope (at left) with its split body tube is relatively inexpensive, yet accessories may be added to do practically any type of advanced work.

Whether you contemplate the purchase of a single microscope for individual use or a quantity as classroom or laboratory equipment, we shall be glad to quote on your requirements. Bausch & Lomb Optical Co., 657 St. Paul St., Rochester, New York.

Rochester, N. Y.

ELECTRIC PLANT DRIER

Convenient, Rapid, Efficient

This apparatus is designed for drying specimens rapidly (over night) by means of heated air currents. The old method of frequently changing felt driers for about a week, is thus done away with. Furthermore—and this is important—the rapid drying tends to preserve natural plant colors, so that a much finer herbarium specimen results.

No. 372 Electric Plant Drier. Complete **\$7.50**
(10% discount in lots of 6 units)
Catalog No. 7 sent to teachers on request.

Turtox Dissection Material

FOR

**Biology, Zoology, Comparative Anatomy,
Embryology, Botany**

One complete floor of the Turtox Laboratories is equipped for and devoted to the preparation of dissection material. Here experienced technicians kill, preserve and inject the specimens supplied for dissection in school laboratories. Each specimen is carefully straightened, well preserved by the most modern methods and must pass rigid inspections. Constant research improves methods and materials making Turtox specimens the finest money can buy.

Send your order for dissection material to Turtox.

Catalog mailed to teachers on request.

TRIARCH BOTANICAL PRODUCTS

Triarch offers you a unique service; no other concern working exclusively on plants presents so wide a selection of materials and services.

Years of study and technical experience enable us to supply you with microscope slides and preserved plants which will really help your students to learn botany.

Prepared microscope slides for general botany, plant pathology, cytology, wood technology, and pharmacognosy; preserved plants; photographs and lantern slides; photomicrographs: these are our regularly listed products, but we are ready to help you in any of your botanical laboratory problems.
