New and Revised Books

LABORATORY EXERCISES IN PLANT BIOLOGY
The use of commonly available living plants and plant materials is stressed in this manual. Both the observational and experimental approach to the subject matter are used. Outline drawings, drawings to be labeled, and questions for thought and discussion are included.
Copyright 1958; 8 1/2 x 11 size; 100 pages; photo offset; illustrated; spiral bound. $2.25.

LABORATORY DIRECTIONS FOR GENERAL ZOOLOGY
Dr. M. W. Boesel, Miami University, Oxford.
This manual, designed for a full-year course, is divided into two distinct parts. Part I deals with the principles of zoology and includes directions for the study of the bullfrog. Part II includes a survey of the animal kingdom in which there are detailed exercises for representatives of all ten major phyla.
Copyright 1958; 5 1/2 x 8 1/2 size; 196 pages; photo offset; illustrated; spiral bound. $2.25.

WORKBOOK FOR FIELD BIOLOGY AND ECOLOGY
Allen H. Benton, N. Y. State College for Teachers, and William E. Werner, Jr., Blackburn College.
Original exercises in eight sections of study give students a wide background in taxonomy, field techniques, terrestrial and aquatic communities and succession, population and behavior studies, field projects and selected literature. The book can be used throughout North America.
Copyright 1957; 5 1/2 x 8 1/2 size; 277 pages; photo offset; illustrated; spiral bound. $2.75.

LABORATORY MANUAL OF GENERAL ZOOLOGY
(INVERTEBRATE)
Chauncey G. Goodchild, Emory University.
A detailed descriptive and functional explanation of invertebrate animals is contained in this manual. Morphology and physiology of the organisms discussed may be studied with a minimum of supervision. A section dealing with demonstration specimens is included to augment dissection by the student.
Copyright 1958; 8 1/2 by 11 size; 71 pages plus worksheets; photo offset; spiral bound. $2.00.

You may order these books by mail. We pay the postage when remittance accompanies order.

A SCIENCE CURRICULUM
Especially Arranged For Preparing Teachers of Science

The prospective teacher may get a minimum of three years in one science (Biology or Chemistry), two years in a second science, and one year in the third science, with the courses in Psychology and Education required for a teaching certificate, including practice teaching in science. Graduate work through the master's degree given in biology and chemistry in order to prepare teachers for the larger high schools or for teaching positions in small colleges.

Write for catalogue mentioning the field of your interest to
