

ATTENTION

The January 1972 issue of the Journal will be devoted primarily to the memoirs of Dr. Samuel Colville Lind which were written in 1962. Born in McMinnville in 1879, Dr. Lind was perhaps Tennessee's greatest native scientist. He was a member of the National Academy of Science and President of the American Chemical Society in 1940. He wrote about his youth, education, and scientific studies, including many humorous incidents. He was one of the pioneers in the study of radiation, particularly with radon gas. After retiring in 1947 as chairman of the Chemistry Department at the University of Minnesota, Dr. Lind spent many active years as a consultant to Oak Ridge until his death in 1965. A limited number of extra copies of this issue will be printed for non-members of TAS. These may be ordered by sending \$2.00, which includes postage, to the Journal Editor.
